

The above logo was designed inspired by a dog logo that you created. We have tried multiple logos in the past, like attached below.

The reason we want a walking logo is because we want to animate it hence we avoided the sitting logo.

What is required?

The walking logo has sharp corner but it's very similar to your logo, so we want a good point of difference or maybe even some unique styles from you with your creativity so the idea is original. Hoping you can help out and thanks in advance :)
